About the speakers	xiii
Opening remarks	
Director-General Sergei Ordzhonikidze	xix
Ambassador Paul Meyer	xxi
Ambassador Cheng Jingye	xxiii
Ambassador Valery Loshchinin	xxiv
Jennifer Allen Simons	xxvi
Chapter 1	
Conference report	1
Introduction	1
Session I: Future and current threats to the peaceful uses of outer space	2
Session II: A rules-based behaviour approach to ensure space security	8
Session III: Leveraging existing instruments to enhance space security	12
Session IV: Developing confidence-building measures	16
Session V: Interactive debate on public awareness and advocacy in policy making	21
Chapter 2	
Threats to the security of outer space: emerging technologies	
Laurence Nardon	23
Introductory remarks	23
Existing technologies	24
Emerging technologies?	25

Chapter 3	
The role of non-state actors in outer space security	
Jeffrey Lewis	31
Non-state actors in outer space	31
Challenges posed by non-state actors	33
Conclusion	36
Chapter 4	
Space weapons and proliferation	
Michael Krepon with Michael Katz-Hyman	39
Defining space weapons	40
The perils of anti-satellite testing	41
ASATs and vertical proliferation	42
ASATs and horizontal proliferation	45
Dominance versus proliferation	47
Conclusion	49
Chapter 5	
Creating rules-based behaviour to help space-faring nations avoid conflict in space	
Douglas G. Aldworth	55
Broadening our concept of space and space security	56
Focusing on ensuring the protection of our space assets	56
Advancing rules-based behaviour	57
Chapter 6	
Addressing the outer space security issue	
Pan Jusheng	61
Outer space security is shared security	61
Challenges to outer space security	61
Ways to maintain outer space security	62
Chapter 7	
Technologies and behaviours of concern: what threatens long-term space security and how can these threats be monitored?	
Laura Grego	67

Chapter 8	
Verification models for space weapons treaties: a flexible, layered approach as a negotiating tool	
Richard A. Bruneau and Scott G. Lofquist-Morgan	73
Introduction	73
Weapon categories: Earth-to-space, space-to-space and space-to-Earth	74
Process steps: research, testing, deployment and use	75
Methods of verification	77
Costs	80
Confidentiality and data management	81
Conclusion	82
Chapter 9	
Space security 2006	
Sarah Estabrooks	93
Introduction	93
The space environment	94
Laws, policies and doctrines	95
Civil space programmes and global utilities	96
Commercial space	98
Space support for terrestrial military operations	99
Space systems protection	100
Space systems negation	102
Space-based strike weapons	104
Chapter 10	
Leveraging the existing UN space machinery for sustainable and secure access to outer space	
G�rard Brachet	107
Background	107
The fading distinction between civilian and military	109
How COPUOS could contribute to the development of this architecture	110

Chapter 11	
The Outer Space Treaty and enhancing space security	
Joanne Irene Gabrynowicz	113
Chapter 12	
The potential for outer space confidence-building measures	
Phillip J. Baines	125
Introduction	125
Rescue agreement reprise	127
Pre-launch notification of rockets	129
A space traffic management system	132
Conclusion	136
Chapter 13	
Transparency and confidence-building measures in outer space	
Anton V. Vasiliev and Alexander A. Klapovsky	139
Chapter 14	
European Space Situational Awareness	
Gerhard Brauer	145
The need for Space Situational Awareness	145
Status of space surveillance in Europe	146
The role of the European Space Agency	146
Space-related European security and defence policy documents	147
Functions of SSA as defined by the panel of experts on space and security	148
Development of a programme proposal for an SSA system	150
Conclusion	151
Chapter 15	
Confidence-building measures: preventing the great from standing in the way of the good	
Theresa Hitchens	153
Acronyms	159
